APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion, place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 16570, Certificate 5504, is issued subject to the terms and conditions imposed in said Permit 16570, Certificate 5504 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 65105, 65106, 68495, 69248, 69249, 69694, 70408, 70873, 71224 and 72108, having a comingled place of use, shall not exceed 1003.62 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled, withdrawn, or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

The water granted in this permit is to be dedicated for water service to the Hafen Elementary School, which includes an athletic field. Any subsequent dedication of water from this permit for a residential subdivision shall be allocated at 1.12 acre-feet per lot. The State Engineer may amend the per lot allocation based on evidence and data supporting such change.

The point of diversion and place of use is as described under items 5 and 7 respectively on the submitted application to support this permit.
